

marine coordinator (m/f/x)

- Location:** VENTUSmarine in Emden (company flat included)
Employment: 24/7 shift operation in rotation with corresponding leisure time compensation
Start: By arrangement
Requirements: Certificate of Competency (COC) according to STCW II/1, Radio Operator Certificate for VHF radio (ROC/GOC)

You will take over the following tasks:

- 24/7 wind farm monitoring with AIS-based VTMS observation systems
- Campaign-dependent marine coordination of German/European offshore wind projects, including emergency coordination as well as documentation of movements of persons, ships and helicopters within the wind farm.
- Coordination and handling of the park's internal and external radio traffic using VHF/TETRA
- Requesting and approving certificates within the framework of the registration of persons and ships, among other things with the help of a permit-to-work system.
- Project related reporting and documentation
- Support for the company's own port agency
- Operational support of the own fleet and other activities of the shipping company

You bring preferably with you:

- Excellent German and English language skills
- Ability to work in a team, resilience, flexibility and an independent way of working
- Safe handling of MS-Office applications and the industry standard hardware (TETRA, VHF, ECDIS)
- Readiness to work holidays, weekends and nights

The coordination centre is staffed around the clock in a shift system, and a company flat in Emden is provided for this purpose.

We are a young, highly motivated team and offer a corporate culture characterised by growth and innovation. Are you the nautical talent we are looking for?
