

# marine coordinator (m/f/x)

<b>Location:</b>	At the locations of our clients, e.g. Denmark (company flat included)
<b>Employment:</b>	24/7 shift operation in 8-12 hr rotation with corresponding compensatory time off
<b>Start:</b>	By arrangement
<b>Requirements:</b>	Certificate of Competency (COC) according to STCW II/1, Radio Operator Certificate for VHF radio (ROC/GOC)

## You will take over the following tasks:

- Wind farm monitoring with AIS-based VTMS observation systems
- Coordination and communication via radio with project vessels and teams on site
- Requesting and approving certificates as part of personnel and vessel registration, including using a permit-to-work system
- Project-related reporting and documentation, including in cooperation with the relevant authorities
- Advising our clients on technical nautical issues
- Emergency coordination via water, land and air according to the project emergency plan

## You bring preferably with you:

- Excellent German language skills (native language or C2 level)
- Excellent English language skills
- Ability to work in a team, resilience, flexibility and an independent way of working
- Confident handling of MS-Office applications and industry standard hardware (TETRA, VHF, ECDIS)
- Readiness to travel and to work holidays, weekends and nights
- Experience as Marine Coordinator or Nautical Watch Officer in offshore wind projects is desirable but not mandatory

During the assignment period, our staff members have free use of a flat at their place of work.

We are a young, highly motivated team and offer a corporate culture characterised by growth and innovation. Are you the nautical talent we are looking for?
